

Maintenance Program – examples for the Whitsundays’ weather

Premium wash & dry: every 2 weeks / or your choice

include

- Remove rust marks with every wash
- Wipe out lips of hatches/storage cabinets
- Remove water spots from windows
- Stainless steel maintenance
- Mechanical check / engine room & bilges

General wash & dry: every 20 days / or your choice

include

- Remove rust marks with every wash
- Wipe out lips of hatches/storage cabinets

Recommended:

- Windows protection every 3–5 months depends on exposure
- Teak clean and maintenance every 3–8 months depends on exposure

Recommended Compound & Wax / Maintenance Cycle:

Generally every 5–7 months do a light / medium compound & waxing, unless you have high standards regarding shine and protection.

If you have a high profile and would like to keep your vessel top condition all year around, do a light compound & waxing every 3 – 4 months.

Ask for our Premium Program with an option to pay monthly and go by 6–8 or 12months terms.

Keep up with a nice shampoo wash & dry between each use.

You will save money on the long run.
